EDUCATION INEQUALITY

OUR RECOMMENDATIONS TO RESOLVE INEQUALITY

Recommendations

- Invest more into Access to Tertiary Education
- Increase Minimum Wage
- More Support for Low-Income Families
- Finance public services in the European Union in a fair way, for example through more progressive taxation
- National Living Wage

Consequences of Recommendations

- Can increase the debt of a country if a larger amount of money is being invested
- Minimum Wage increase means that inflation will occur

A vintage-style map with various geographical features, colors, and text labels serves as the background. A white rectangular box with a thin green border is centered on the map. Two dark grey horizontal bars are positioned on the left and right sides of the white box, partially overlapping the map. The text "Thanks For Listening" is written in a large, black, serif font within the white box.

Thanks For Listening
