

# The European Green Deal

---

Question : Is the EU Green Deal realistic ?

# Contents

1. Context of the Green Deal
2. What is the EU green deal concretely ?
3. The budget mobilized
4. The difficulties of this pact
5. Conclusion

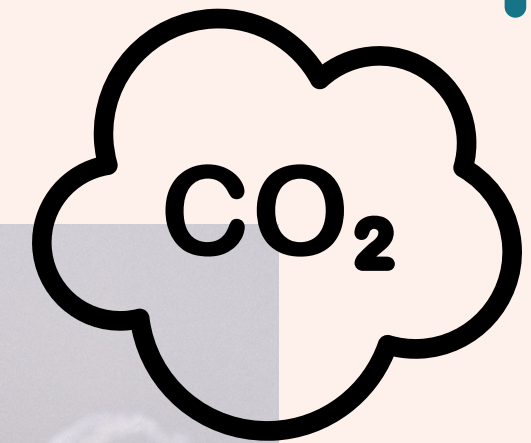

## Context of the Green Deal

IPCC - Intergouvernemental Panel on Climate change

- warning us the need to act
- 2018 : report - the temperature contained to 1.5°C to limite extreme events
- Protocole Kyoto 1997 - action beginning
- EU - most polluting countries

2019 : EU committed to become carbon neutral by 2050

Before 2030 : 55% reduction in emissions

## What is the EU green deal concretely ?

2011 - goal set by the European Commission

December 2019 - confirm member states

EU green deal - set of initiatives  
to put them on a green transition

July 2021 : Fit for 55 adopted  
proposals pack - to achieve the climate  
target of 55% emission reduction by 2030  
impact everyone

## Main objective :

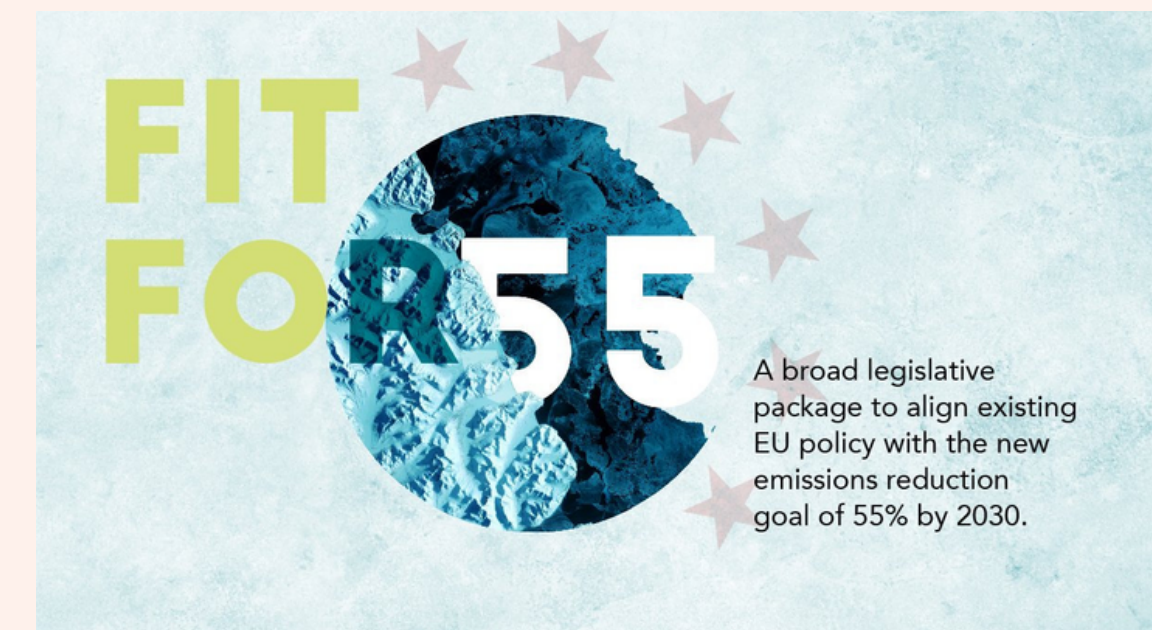

becoming carbon neutral by 2050 with  
55% reduction in emissions by 2030

# FIT FOR 55

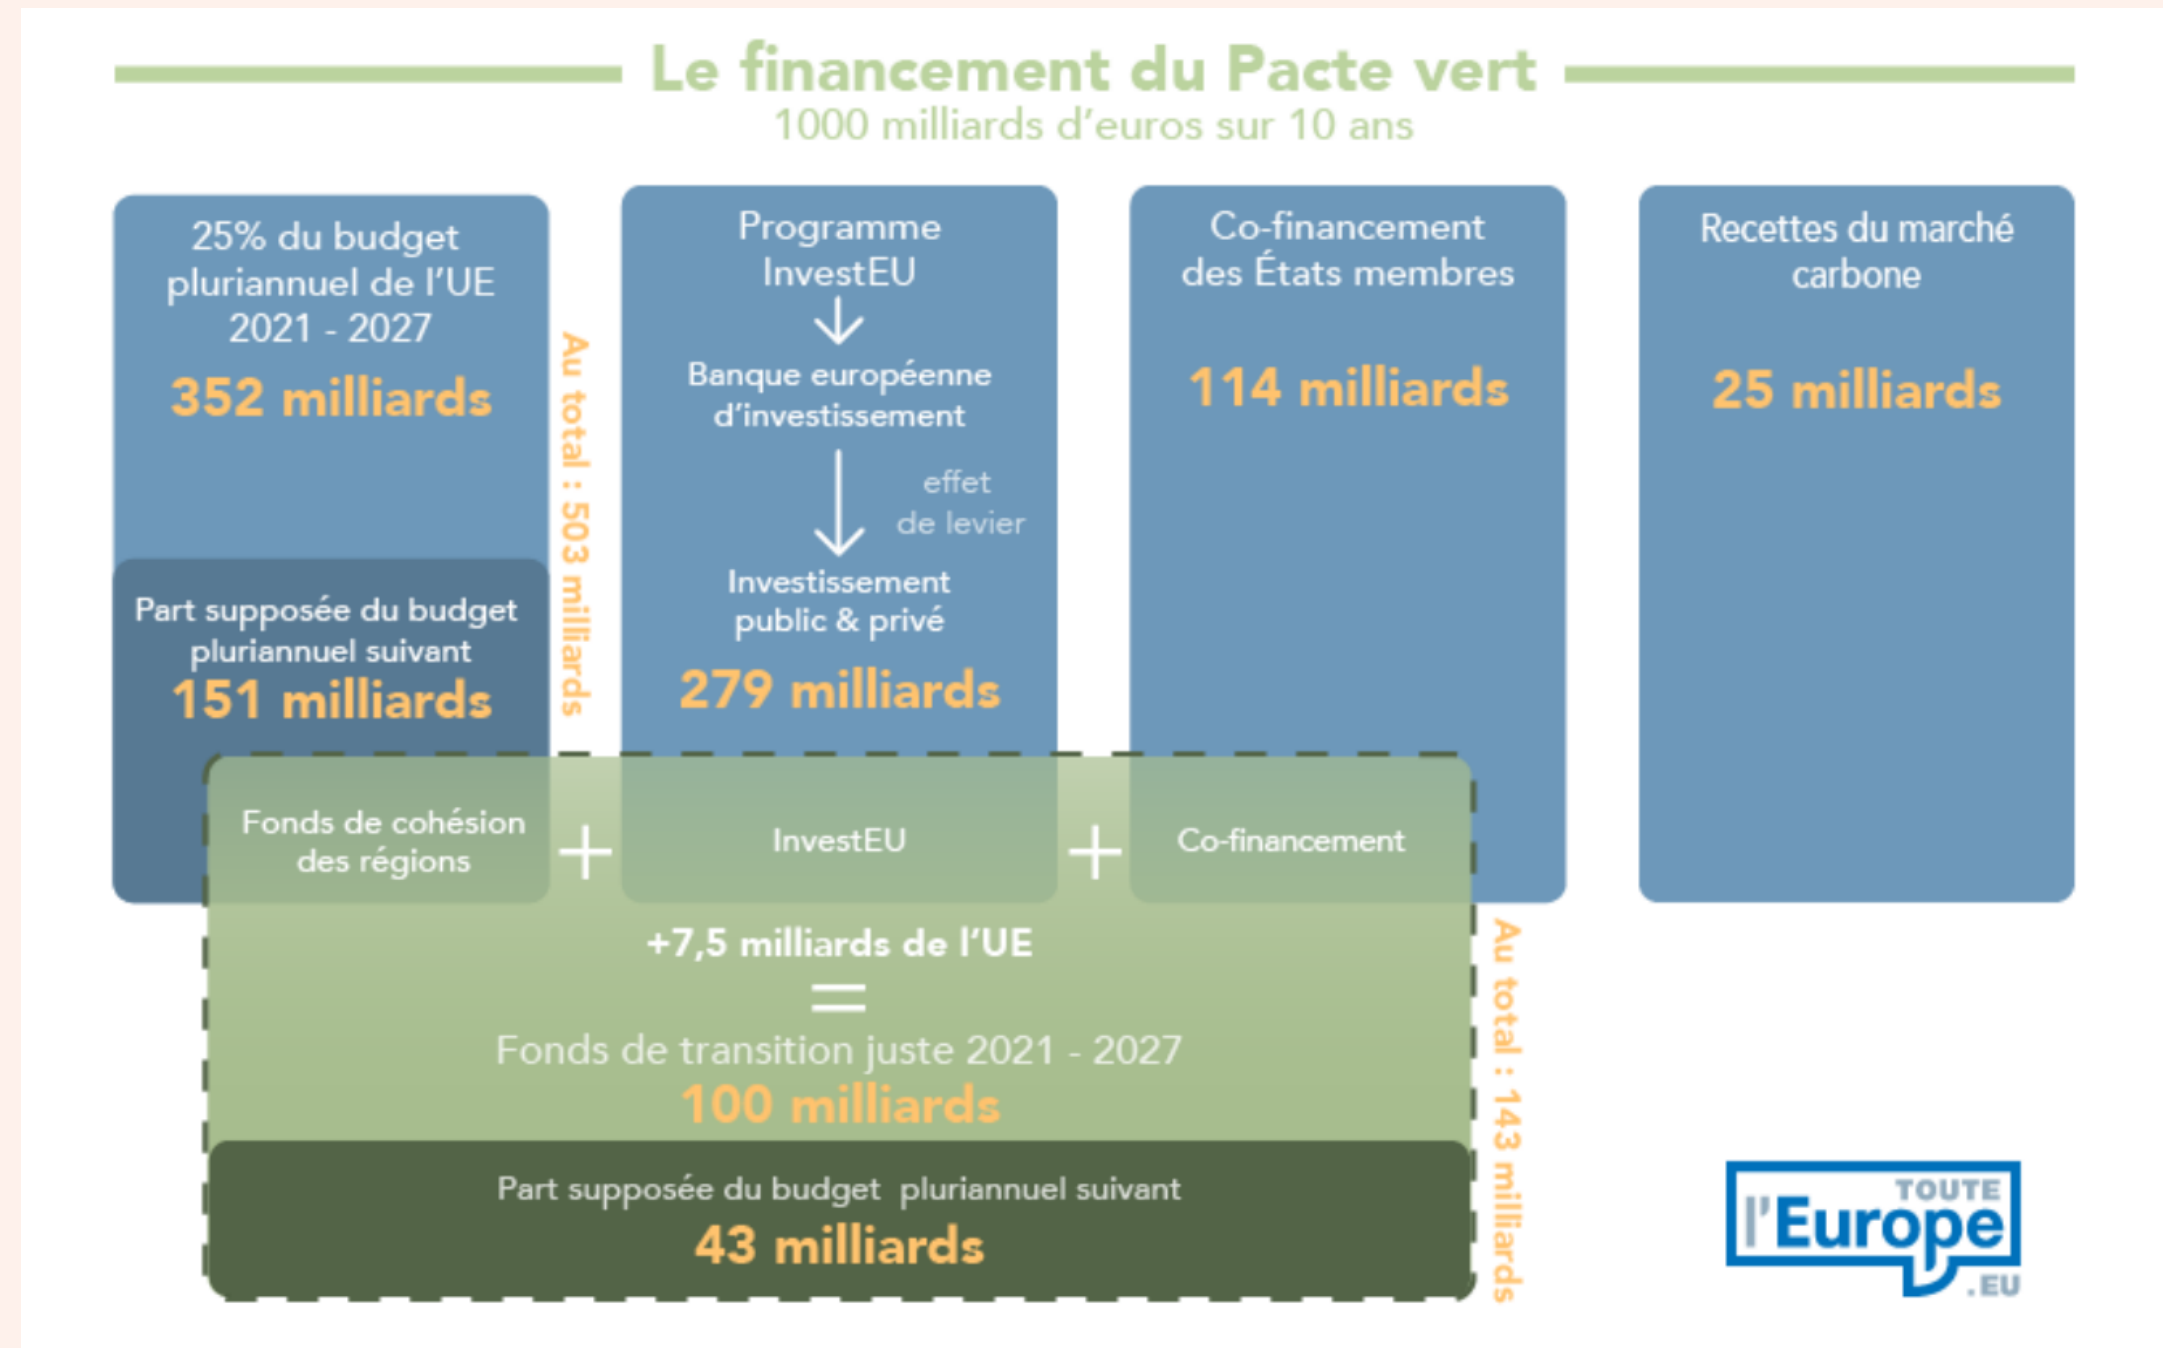

These proposal are :

- Climate action - climate neutrality by 2050
- Clean energy - renewable energies, decarbonization
- Sustainable industry - carbon tax to some countries
- Sustainable agriculture
- Biodiversity - protect ecosystem and species
- From farm to fork - more respectful food system
- Building and renovating - re-use or renovate building
- Eliminating pollution
- Sustainability mobility - green transport

# Budget mobilized for the EU's Green Deal

public and private investments  
raise at least 1 trillion euros

# The difficulties of this pact

Countries opposed to the green deal :  
Mainly Europe central

	Estonia
	Czech Republic
	Poland
	Hungary

## Why ?

- dependant on fossil fuels
- financial cost very high

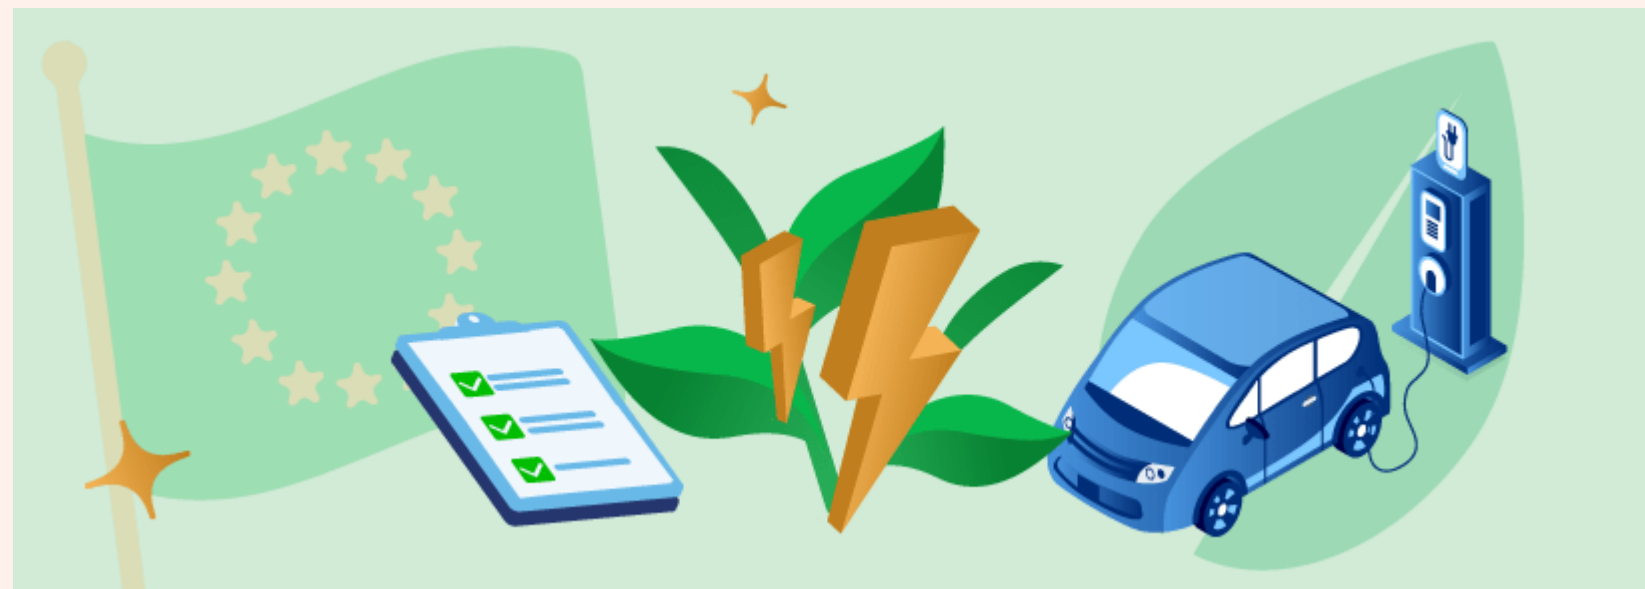

## Example : Poland

- most coal-dependant member states
- one of biggest polluters
- first who didn't signed

# Conclusion

---

- comprehensive and intelligent program
- good program for ecological transition
- country - take initiatives
- unrealistic - complicate to change the ways to live
- countries - dependant to fossils source / essential economy
- do actions step by step
