

NEOLIBERALISM

Introduction

What is Neoliberalism ?

Freedom of private enterprises ?

State intervention ?

SUMMARY

I. The principles of neoliberalism

II. The history of neoliberalism and its development

III. The effects of neoliberalism

IV. The critiques of neoliberalism

Conclusion

I. THE PRINCIPLES OF NEOLIBERALISME

The importance of the free market

The market should function with or without any intervention from the state

Privatization and deregulation

To transfer public services and enterprises to the private sector

The reduction of the State's role

To limit state intervention to the protection of property rights, security, and national defense

II. The history of neoliberalism and its development

The origins of neoliberalism

Friedrich Hayek & Milton Friedman

The rise of neoliberalism in the 1980s

Ronald Reagan & Margaret Thatcher & Brian Mulroney

III. THE EFFECTS OF NEOLIBERALISM

On the global economy

Economic growth in some countries & an increased concentration of wealth

Social and economic inequalities

An increase in income and wealth inequalities

Impact on democracy and politics

Wealthy individuals and profitable businesses reinvest their profits into the economy for the benefit of society as a whole

IV. The critics of néolibéralism

Economic critiques

The increase in inequalities and poverty, especially in developing countries

Social and ethical critiques

The focus is on the maximization of profit at the expense of social welfare

Political critiques

The dominance of large corporations and multinational companies

Conclusion

Since the 1980s, this ideology has led to a redefinition of the state's role in several countries

Economic prosperity stems from competition among individuals, the freedom of businesses, and limitations on government intervention

Who not Neo-Keynesianism instead?
